

## FIELD WORK ACTIVITY LOG

A “Field Work Activity Log” should be maintained for every field that you manage (organic, transitional, and conventional.) Applied inputs, including manures and composts, must be documented, including the date and rate of applications. For cultivation practices, the machinery setting should be logged in the rate row, if known. **This form, documenting the last 3 years of production, should accompany your Organic System Plan or Update.** Include a copy of all input tags with this form.

Field Number: \_\_\_\_\_ Code: \_\_\_\_\_ Acres in Field: \_\_\_\_\_

*Code: O = Organic; T = Transition/Conversion to Organic; C = Conventional*

			Present Year 200__			Previous Year 200__			2 <sup>nd</sup> Previous Year 200__			3 <sup>rd</sup> Previous Year 200__
